Experience

Quality Engineer Career Experience
2026-Present

- Validated Xcode's migration to a new project file format with an automated round-trip test harness run across 15+ builds, uncovering 10+ bugs before release and protecting developers' projects from silent data loss.
- Designed test coverage for the new format and a new command-line tool, building a 139-case regression suite and XCTest tests in the Xcode source tree, identifying 4 high-severity bugs and keeping fixes covered by tests.
- Root-caused crashes and data-loss bugs in the source code, writing clear bug reports and leadership updates, helping shape release decisions.

Product Zone Expert
2025-2026

- Led a store-wide Services effort, coaching team members with no services sales to personalize recommendations, lifting the store from 8% to above the 25% benchmark and making Services a consistent strength.
- Onboarded 15 new hires alongside the store trainer through full training and floor shadowing, building the habits behind improved team metrics.
- Shared peak-time strategies for serving several customers at one table with Experts from Corte Madera and Palo Alto, increasing Hero units and Services sold at partner stores, extending our results to other markets.

Product Zone Specialist
2024-2025

- Created Apple owners through personalized, multilingual demos while helping multiple customers during launches, generating $2.34M in revenue with a customer feedback score of 99, reflecting consistently exceptional service.
- Designed a system for tagging trade-in devices in the setup area, which reduced lost devices earning an Exceeds Expectations rating in Innovation.
- Generated business opportunities by uncovering quality leads and engaging key stakeholders, introducing 110+ customers to the Business Team and growing relationships by upgrading 5+ businesses to higher spending tiers.

Parabolic Labs — iOS Developer
2023-2024

- Co-founded an immersive live comedy platform on visionOS, shipping features from prototype to production, earning 3 App Store features from Apple and placing the platform among Apple's highlighted visionOS experiences.
- Developed a dental health monitoring app powered by custom-trained Core ML models built from original clinical research, turning the findings into an intuitive experience for users.
- Built five iOS apps in Swift/SwiftUI with modular MVVM and async/await architectures and HIG-consistent UI, keeping code maintainable and interfaces consistent across apps.

Education

University of Surrey
Guildford, United Kingdom
Bachelor of Science in Computer Science and Information Technology, 2022
